

geoliner® 650 Gen4

3D Wheel aligner

A generation ahead

geoliner® 650 Gen4

The geoliner 650 Gen 4 is the first step in Snap-on Equipment 3D alignment technology portfolio. Based onto the powerful camera technology, the geoliner 650 Gen 4 offers 3D technology at a best convenient price.

The new ultra high resolution cameras, the handy ultra high resolution targets and the power of the Pro42 software provide the technician with an incomparable professional tool to speed the alignment process.

Alignment readings are available in less than 2 minutes, this saves time and increases productivity of the workshop.

The new Gen 4 series offers the following productivity-enhancing features:

- 3D animations
- EZ-Link
- A-arm adjust
- EZ toe

The compact ergonomic control terminal is fitted on the camera lift. With an optional base plate the control terminal can also be positioned adjacent to the camera lift.

More advantages of the geoliner 650 Gen 4:

- Available with camera lift, or with no supports. Short supports, tall supports, or a wall-mounted tilt camera beam are available as optional extras.
- Innovative design saves workshop space
- The Pro42 software supports simple, accurate and quick wheel alignment
- Ultra high resolution targets, extremely lightweight and space saving
- Vehicle database with nearly all car models of the past 25 years
