Porsche & Peugeot
to name a few!

Straight from the operators!

“I am delighted with the equipment and so are my customers. It does exactly what it is designed to do. Any brake problems are solved in a short amount of time thanks to the Procut. We can offer a added service to the customer and they are delighted that we have the technical expertise to help them.”

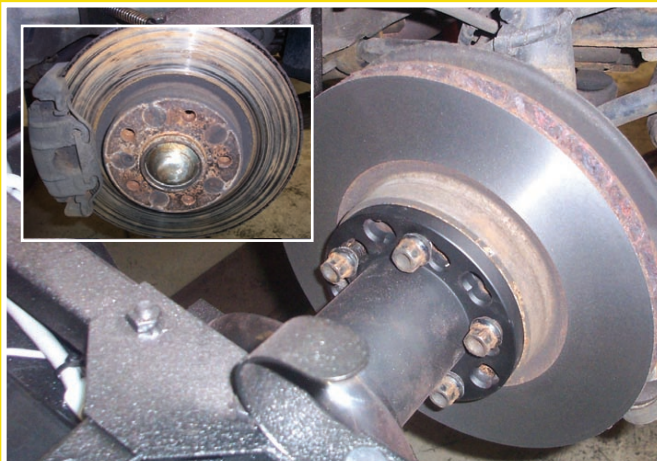

CLIVE JENKINS OF RJM AND SONS

“I ask the customer if he would like his discs skimming when they come in for brake pad renewal. Most of them agree because the cost usually works out at about £15 a wheel. The big 4x4's cost a little more but even them customers are delighted with the service. The benefits are good to the customer and it gives me the opportunity to maximise my profits. The customer is delighted and I have more to my turnover. It is a win win situation.”

NEIL WEBB, PARKSIDE GARAGE

“The Procut has been a revelation. We can now offer the customer new service which saves him money but more importantly keeps business in our garage and broadens our service. The Procut was one of the best decisions I have made, it is easy to use and ‘does exactly what it says on the tin.’”
