

PRODUCT DESCRIPTION

A/C system flushing is becoming increasingly important for the car service and repair sectors. Car manufacturers have recently set forth precise guidelines on the procedures to be followed for work deemed necessary after the replacement of a component within the A/C system.

ROBINAIR presents its new **FLUSHING KIT** for **ROBINAIR** A/C recharge stations, developed in cooperation with the most important car manufacturers. Thanks to completely automatic operation and to the wide range of adapters and bridges for expansion valves available, the kit allows a reduction in labour costs.

TECHNICAL FEATURES

- **Semi-automatic cycle**
- **More than 50 adapters and bridges for expansion valves available**
- **Customisation of the print-out**
- **Conformity with car manufacturer guidelines**

ADVANTAGES

- **Labour cost reduction (automatic function)**
- **Complete kit of adapters and bridges for expansion valves**
