NEW

## HOFMANN POWER WEIGHT 380

IN NINE COLOURS

Our new premium balancing weight HPW 380 was developed for motor sports and offers best performance for the highest demands. Produced to OE standards and optimised for the workshop. The weight has a resilient plastic coating for permanent corrosion protection. With its patented production procedure, the adhesive weight is easy to attach and perfectly adapts to the rim contour. With the

**SPEEDLINER®** Innovation you can remove the weight from the rim without leaving any traces. With 12 segments of 5 gram, it can be easily divided by the perforated adhesive tape if required.

Dimensions: 172 mm (length) x 19 mm (width)  
 Total height including adhesive tape: 3.8 mm

PERFECT FIT	EASY SEPARATION	REMOVABLE WITHOUT LEAVING TRACES
		
STRONG ADHESIVE	CORROSION RESISTANCE	NINE COLOURS

ZN	Zinc
60	60 Gram (12x5)

# HOFMANN POWER WEIGHT 380

IN NINE COLOURS

## Perfect fit

With grid bridge technology, the weight adapts quickly and easily to the rim radius. The bridge ensures a stable connection between the individual segments to aid in mounting.

## Easy separation

The unique perforation of the adhesive tape permits easier division of the individual segments in the desired grammages. Cutting tools are no longer required and you will get a perfect balancing result more quickly.

## Strong adhesive

Our new adhesive tape technology **SPEEDLINER®** ensures strong adhesion on all common rim types, even when not pre-cleaned perfectly. The adhesive has been optimised specifically according to our specifications and not only features a higher initial tack, but also achieves its maximum final adhesive strength even faster than before.

## Removable without leaving traces

Marking a first, the new adhesive strip has a 5-layer structure. A special intermediate reinforcement film with exceptional tear-resistant properties ensures strong cohesion within the adhesive strip. Thanks to this long-lasting bond structure, removing the adhesive weight strip is a much easier job: any foam residue sticks to the reinforcement film and the adhesive weight can thus be lifted off without leaving any traces behind.

## Design

Featuring the highest-quality manufacturing process, our weights visually enhance every rim design.

## Corrosion resistance

High-quality plastic coating to OEM criteria protects the weight from corrosion in any weather. This also protects the rim from contact corrosion.

## Nine colours

The new weight is available with high-quality powdercoating in white, silver, anthracite, black, blue, yellow, orange, red as well as chrome-plated.
